To whom it may concern,

I have had the pleasure of collaborating with Michael Orban over the past 1.5 years, even though his involvement with The Highground and Camp Victory exceeds beyond that. Mr. Orban has been a guest speaker for several of our veteran events, veteran retreats and most recently, our "Exploring PTSD" exhibit in our museum.

He is extremely passionate about helping veterans that have physical, emotional and mental effects of military service with life after service. His involvement and knowledge with depression, suicide, addiction and recovery needs to be shared with all. My opinion, he is one of the best veteran mental health professionals that I have meet. Not only has he been very open in sharing his experiences, but genuinely wants to hear your military experiences. I wish I would have meet him before I left military service, my journey would have been a lot less rocky.

There are so many veterans and their families that have benefited from his knowledge, expertise, and stigma free messaging at The Highground and I hope others throughout the country have the opportunity to do the same.

Chris Pettis
